Kapil Jangid

AI Driven Full Stack Developer | Building Intelligent, Scalable
Solutions | Generative AI & Machine Learning Enthusiast | Problem
Solver | Gaming Enthusiast
Ahmedabad, Gujarat, India

Summary

I am an AI driven full stack developer focused on building intelligent, scalable and user centred digital solutions. My work combines modern web development with Artificial Intelligence to create products that do more than function. I aim to build systems that understand context, automate repetitive processes and solve real world problems through practical technology. I enjoy working across the complete development lifecycle, from shaping an idea and designing the user experience to developing the frontend, building backend systems, integrating databases and adding AI powered capabilities. My areas of interest include Generative AI, machine learning, intelligent automation, APIs and full stack product development. Beyond development, I value continuous learning, experimentation and problem solving. I enjoy exploring emerging technologies, improving existing systems and turning ambitious ideas into usable products. My mindset is simple: Code. Create. Play. Repeat. I am currently focused on strengthening my expertise in AI driven full stack development while building meaningful projects that combine creativity, technology and impact.

Education

SILVER OAK UNIVERSITY

Bachelor of Technology - BTech, Computer science and engineerin · (July
2025 - July 2029)

Indian Institute of Technology, Madras

Bachelor of Science - BS, Data Science and Applications · (September 2025)

G S Jangid Memorial School

Class XII, Physics, Chemistry and Mathematics · (April 2022 - April 2024)

Laxmi Devi Mundra Public School - India
